Pasuruan, East Java, Indonesia

As a fresh graduate in Instrumentation and Control Engineering Technology from Universitas Airlangga, I bring a strong enthusiasm for exploring new ideas and translating them into practical engineering solutions. I thrive in dynamic environments, continuously seeking opportunities to learn, adapt, and collaborate across diverse teams and networks. With a solid foundation in problem-solving and system-based thinking, I am eager to build a career across Process Control and Automation, Process Manufacturing Industry, Embedded Systems, PLC and SCADA Programming, and Robotics Engineering, Oil and Gas Instrumentation, Mining Instrumentation, IoT, Hardware Engineering, and Telecommunication and Network Infrastructure.

EDUCATION

Airlangga University - Surabaya, East Java

Sep 2021 – Aug 2026

Bachelor of Applied Science in Instrumentation and Control Engineering Technology, GPA 3.47

- Gold Medalist in KIM-KI Class at Airlangga University.
- Designed a 3 DOF Articulated Linear robot arm with Inverse Kinematics-based motion control.
- Developed an HMI-based App Controller with a python programming language, enabling real-time command input and monitoring for the 3 DOF Articulated Linear robot arm.
- Designed and built an IoT-based LPG gas leakage detection system integrating ESP32 and MQ-2 sensor with real-time Android app notifications to enhance household safety monitoring.

WORK EXPERIENCE

CV Kreasi Industri Nusantara - Surabaya, East Java

Mar 2025 – Jun 2025

Internship

- Conducted functional testing on the Automatic X-Ray Buckle Table prior to deployment to verify mechanical performance and operational readiness.
- Performed electrical component inspection and wiring tests to ensure system safety and functionality before operational use.
- Programmed a simplified PLC system as a reference model for an interactive industrial robotics learning module.

Balai Standardisasi dan Pelayanan Jasa Industri Surabaya - Surabaya, East Java Jan 2024 – Jan 2024

Internship

- Analyzed EMC test graphs for conducted and radiated emissions to assess standard compliance.
- Reported EMC test result graphs to the Head of the EMC Laboratory for technical evaluation.
- Compiled household appliance test data in Excel and submitted results to the Head of the Household Appliances Laboratory.

SKILLS, TOOLS, AND LANGUAGES

Soft Skills :

- Problem solving, time management, analysis skill, teamwork, communication, critical thinking.

Hard Skills :

- Electrical engineering, electrical wiring, hardware and mechanical engineering, programming language (C/C++, Python, HTML, CSS), internet of things (IoT), 3D design.

Tools :

- VS Code, Ms. Office (Ms. Excel, Ms. Word, Ms. Power Point), EasyEDA, AutoCAD, and Arduino IDE.

Language :

- English (Intermediate).
- Indonesian (Native).

CERTIFICATES

Intro to Software Engineering

Jul 2026

RevoU

IoT Communication Models for Beginners

Oct 2025

MindLuster

Python Programming Beginner to Advance

Sep 2025

MindLuster

LEADERSHIP ACTIVITIES

Airlangga Strike Team Robotics and Instrumentation - Surabaya, East Java

Feb 2023 – Jun 2024

Head of ALEGRO Division

- Led the ALEGRO division team as Team Leader in the Search and Rescue (SAR) robot category of the Indonesian Robot Contest (KRI), overseeing strategy, coordination, and technical execution.
- Managed integration and control of multiple sensors to optimize robot navigation, detection accuracy, and overall functional performance.
- Delivered technical training sessions to SAR Division members within ASTRAI Class, covering robotics concepts and hands-on skill development.

Student Association of Instrumentation and Control Engineering Technology

Jan 2023 – Jan 2024

- Surabaya, East Java

Secretary in Youth and Sports Department

- Documented and maintained activity agendas for the Youth and Sports Department to support organized planning and scheduling.
- Recorded and compiled meeting minutes for the Youth and Sports Department, ensuring accurate documentation of discussions and decisions.
- Reported departmental activities and progress to the Head of the Youth and Sports Department to support oversight and coordination.

Airlangga Innovation Technology Competition - Surabaya, East Java

Dec 2023 – Dec 2023

Staff of Equipment Division

- Managed inventory planning and resource allocation of tools and materials for the Airlangga Innovation Technology Competition to support event preparation and operational efficiency.
- Coordinated with the Head of the Equipment Division to ensure accurate resource tracking throughout the event.
- Organized and distributed tools and materials during the competition to ensure smooth execution of all event activities.

Community Engagement - Sidoarjo, East Java

Sep 2023 – Sep 2023

Staff of Equipment Division

- Coordinated logistics by preparing a full inventory of tools and materials required for the Community Engagement program.
- Supported resource allocation efforts by liaising with the Head of the Equipment Division on equipment planning.
- Delivered educational sessions on robotics fundamentals and conducted live demonstrations of a line-follower robot for children in Jetis Village, fostering early interest in STEM and technology.
